	Vishwakarma Institute of Information Technology
	Department of Artificial Intelligence and Data Science

Student Name: Siddhesh Dilip Khairnar		
Class: SY	**Division: B**	**Roll No: 272028**
Semester: 4th		**Academic Year: 2022-23**
Subject Name & Code: Soft Skill		
Title of Assignment: Public Speaking		

Prepared speech (Topic: Big Data)

Summary: The importance of big data lies in its potential to unlock valuable insights and patterns that can help organizations make more informed decisions. By analyzing large sets of data, companies can gain a better understanding of their customers, market trends, and industry dynamics.

However, working with big data comes with its own set of challenges, such as data management, security, and privacy concerns. Companies need to implement effective data governance policies and invest in advanced analytics tools and technologies to make the most of their big data initiatives.

In conclusion, big data has the potential to revolutionize the way businesses operate and make decisions. With the right strategy and technology, companies can leverage big data to gain a competitive advantage in today's fast-paced digital world.

Extempore speech (Topic: Chat GPT)

Summary: ChatGPT is a large language model trained by Open-air, based on the GPT-3.5 architecture. It has been designed to mimic human-like conversations, and it has the ability to understand and respond to natural language inputs in real-time.

The significance of ChatGPT lies in its potential to revolutionize the way we interact with machines. It can be used for a wide range of applications, including customer service, virtual assistants, and chatbots.

By leveraging ChatGPT, organizations can automate their customer service operations, improve response times, and provide personalized experiences to their customers. ChatGPT can also help businesses collect valuable customer feedback, improve their products and services, and increase customer satisfaction.

However, working with ChatGPT requires a deep understanding of natural language processing and machine learning. Companies need to invest in advanced AI technologies and data management systems to effectively leverage ChatGPT in their operations.

In conclusion, ChatGPT is a powerful tool that has the potential to transform the way businesses interact with their customers. With the right expertise and resources, companies can leverage ChatGPT to improve their customer service operations and gain a competitive advantage in today's digital world.

Self-Assessment

Positive Aspects: I explain complex concepts easily with a lot of real-life examples and during presentation I hold myself strongly in front of other students full of confidence. While speaking in front of others I maintain my body language and expression.

Negative Aspects: I notice that I tend to speak very fast, and, in some sentences, I get stuck. And I am struggling to maintain eye contact with all the audience seating behind.

Need improvement: I need to Create the framework for speech and need to study more about the types of audience. Writing down the topic, general purpose, specific purpose, central idea, and main points will help me to improve my public speaking. And I need to Make sure to grab the audience's attention in the first 30 seconds.
